### **DETAILED ACTION**

This action is issued in response to amendment filed 10/14/08.

Claims 1-6 were amended. Claims 7-20 were withdrawn from consideration.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Regarding claims 1-6 the claimed invention is directed to non-statutory subject matter.

Since the claimed invention is software per se. therefore it is non-statutory.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1, the fundamental issues exist in the record. The independent claim calls for software or application to re-configure a computer to function as a server, whereas it is not possible for all forms of software to perform this function. In general, the claims should be further amended to recite the specific software needed to accomplish the re-configuration, and

Art Unit: 2169

clarified to recite that this necessary software will be transferred to the workstation or client actually being re-configured.

Although no art is applied in this office action, No indication of allowable subject matter are made due to the utility issues raised under 35 USC 101 and 112 rejections.

### ***Response to Arguments***

Applicant's arguments filed 10/14/08 have been fully considered but they are not persuasive.

Applicant amendment overcomes the 101 and part of the 112 rejection. However, Applicant did not overcome the rest of the 112 rejection "The independent claim calls for software or application to re-configure a computer to function as a server, whereas it is not possible for all forms of software to perform this function. In general, the claims should be further amended to recite the specific software needed to accomplish the re-configuration, and clarified to recite that this necessary software will be transferred to the workstation or client actually being re-configured." As stated in the rejection dated 7/17/08. Therefore the rejection is maintained and finalized.

### ***Conclusion***

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2169

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
